EDUCATION

B.E Computer Science And Engineering JCT College Of Enginnering & Technology

10/2021 - Present TamilNadu, India

12th, Computer Science St.Thomas HSS Mayannur

06/2020 - 03/2021 kerala, India

WORK EXPERIENCE

Intern Prodigy infotech

08/2024 - 09/2024

Achievements/Tasks

- Full-Stack Web Development
- Team Collaboration
- Bug Fixes and Maintenance
- Version Control
- Api Integration
- Deployment & Documentation

Contact: https://prodigyinfotech.dev

python programming intern Vault o fCodes

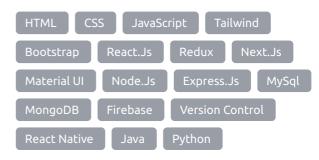

12/2023 - 01/2024

Achievements/Tasks

- Team Collaboration
- Learning New Technologies
- Documentation

Contact: vaultofcodes@gmail.com

SKILLS

PERSONAL PROJECTS

Full-Stack E-commerce (09/2024 - 09/2024)

- Created a robust e-commerce website using React. is for the front end, Node.js with Express.js for the back end, and MongoDB for data management.
- Implemented Stripe payment gateway to handle secure transactions, providing a seamless checkout experience for users.
- Ensured a responsive and intuitive interface with React.js, while optimizing server-side performance with Node.js and Express.js.
- Utilized MongoDB for efficient and scalable data storage, handling product listings, user profiles, and order details.

Blog App (08/2024 - 08/2024)

- Created a dynamic blog app using Next.js 14, leveraging server-side rendering and static site generation for optimal performance and SEO.
- Built a comprehensive admin dashboard for content management, including post creation, editing, and user administration, using Next.js 14 for seamless user interactions.
- Integrated MongoDB for database management, Express.js for backend API routes, React.js for the front end, and Node.js for server-side operations.
- Implemented NextAuth for secure user authentication and authorization, ensuring a robust and user-friendly login system.

Expense Tracker (05/2024 - 05/2024)

- Developed a full-stack application using GraphOL for data management, with a React front end for an interactive user experience and Express.js for the backend.
- Integrated Apollo Client and Apollo Server to streamline GraphQL queries, mutations, and data management, enhancing client-server interactions.
- Implemented MongoDB for efficient and scalable storage of user data and expense records, ensuring flexibility and reliability.
- Deployed the application on a cloud platform, optimizing performance with efficient data fetching and robust security measures.
